

HARDROCK® Multi-Fix Recovery Board

Manufactured with an integral mineral coated glass fibre fleece, which for adhered membranes, secures a strong bond between membrane and insulation.

HARDROCK® Multi-Fix Recovery Board

General Information

HARDROCK® Multi-Fix Recovery Board is specifically developed for use on flat roof refurbishment projects.

HARDROCK® Multi-Fix Recovery Board is ideal for both domestic and commercial refurbishment, in addition to up-stand details, and can be installed directly over the in-situ roof membrane easily handling any minor imperfections on the existing external finish.

HARDROCK® Multi-Fix Recovery Board is manufactured with an integral mineral coated glass fibre fleece, which for adhered membranes, secures a strong bond between membrane and insulation whilst limiting the amount of adhesive required.

HARDROCK® Multi-Fix Recovery Board is compatible with all commonly used flat roof membranes including:

- Single-Ply & EPDM
- Bitumen membranes
- Liquid membrane systems

Advantages

- Can be installed directly over the in-situ roof membrane
- Will accommodate minor imperfections on the existing external finish
- Can be adhesively applied or mechanically fixed
- Excellent heat resistance, ideal for torch applied bitumen systems
- A single solution that is compatible with most roof coverings
- Reduces external noise ingress
- CE Marked

Applications

HARDROCK® Multi-Fix Recovery Board is suited to:

- Domestic refurbishment
- Commercial refurbishment
- Upstand details

HARDROCK® Multi-Fix Recovery Boards are completely fire safe and can be used to provide an effective acoustic barrier to external noise pollution.

HARDROCK® Multi-Fix Recovery Board

Acoustic Performance

When tested in accordance with BS EN ISO 10140-2:2010 as an individual 30mm layer within a single ply flat roof system, onto a 0.7mm profiled steel deck, the system performance achieved ***Rw 33 dB. HARDROCK® Multi-Fix Recovery Board is the ideal solution for flat roof refurbishment on schools and supports the current acoustic refurbishment standards as listed in Table 1 of the Building Bulletin 93 document, "Acoustic Design of Schools: Performance Standards."

Installation

Warm roofs and cold ventilated roofs

HARDROCK® Multi-Fix Recovery Board has been specifically developed for use on flat roof refurbishment projects.

- Remove any loose debris.
- Mechanically fix or bond HARDROCK® Multi-Fix Recovery Board through/to the existing roofing membrane and/or insulation, into the roof deck, always ensuring that the existing deck is in a reasonable condition. A compatible adhesive must be used for bonding the insulation to the existing surfaces.
- 4N° fixings per m² are required (5N° per board) for all bonded and torch applied membranes (see recommended installation section containing fixing pattern, below).
- For all applications the boards should be laid in a staggered pattern with the mineral fleece facing upwards.
- Apply the new membrane to HARDROCK® Multi-Fix Recovery Board (see fixing guidelines overleaf).
- The existing cross ventilation of cold roof systems must always be maintained.

ROCKWOOL recommend the use of a plastic tube washer, or stress plate support thread when mechanically fastening roof boards to metal, concrete or timber deck warm roof systems. A stress plate and fastener fixings are required for ventilated timber deck cold roof systems.

HARDROCK® Multi-Fix Recovery Board

DECLARED PERFORMANCE	
Upper surface	Mineral-coated fibre tissue
Core	Stonewool
Lower surface	No facing
Thermal conductivity	value = 0.039 W/mK
Fire classification	Euroclass A2-s1,d0
Water vapour resistance	5.9MNs/g
Compliance	BS EN13163, ISO 14001
Thickness	30 mm*
Width	1000 mm
Length	1200 mm
Weight (gross/net)	6.340 kg
Packs per pallet	40
m ² per pallet	48
m ² per pack	1.2 m ² per board
