

Product Data Sheet

RAVATHERM XPS X 700 SL

A rigid, closed cell type extruded polystyrene board with integral high density skin.

Ravago BUILDING SOLUTIONS

RAVATHERM XPS X 700 SL

General Information

RAVATHERM XPS X 700 SL inverted roof insulation are a rigid, closed cell type Extruded polystyrene board with integral high density skin. RAVATHERM XPS X 700 SL inverted roof insulation has a Zero Ozone Depletion Potential (ODP), a Global Warming Potential (GWP) of less than 5 and an A rating in accordance with the Green Guide to Specification. For use with suitable Inverted Roof Waterproofing systems.

Suitable applications

RAVATHERM XPS X 700 SL is suitable for use in roofs, roof terraces, enclosed balconies over heated space and insulated walkways in an inverted roof construction. When used in the inverted roof constructions listed in the Fire Performance section below roof constructions incorporating RAVATHERM XPS X 700 SL achieve Broof(t4) Classification to BS EN 13501-5 as required by Approved Document B 2019 edition, Section B4, Limitations on roof coverings.

RAVATHERM XPS X 700 SL is not suitable for use in inverted roof applications on specified attachments such as projecting open balconies, projecting enclosed balconies, recessed open balconies or recessed enclosed balconies.

RAVATHERM XPS X 700 SL is not suitable for use in warm roof applications (where the waterproofing is installed above the insulation board).

Certificates

BBA certificate No. 13/4995, ISO 9001@2008 Quality Management System, ISO 14001 :200 Environmental Management System, EPD as per ISO 14025 and EN 15804.

Resistance to foot traffic

The product, in conjunction with the specified ballast layer, can accept limited foot traffic associated with maintenance operations (BBA Certificate No.13/4995).

Durability

The product will have a life of at least 25 years under normal circumstances (BBA Certificate No.13/4995).

Fire Performance

As a roofing system for roofs, roof terraces, enclosed balconies over heated space and insulated walkways

In accordance with Annex of Commission Decision 2000/553/EC, when used in an inverted roof specification including an inorganic covering of either loose laid gravel with a thickness of at least 50mm or a mass \geq 80 kg/m², sand/cement screed to a thickness of at least 30mm, or cast stone or mineral slabs of at least 40mm thickness a roof system incorporating RAVATHERM XPS X 700 SL can be considered to be unrestricted under the national Requirements (Classification Broof(t4) to BS EN 13501-5:2016).

Hexabromocyclododecane (HBCD) was phased out prior to the 21st August 2015.

Quantum Insulation, Holland House, Valley Way, Rockingham Road, Market Harborough, Leicestershire LE16 7PS. T: 01858 456018 E: sales@quantuminsulation.com www.quantuminsulation.com

RAVATHERM XPS X 700 SL

General Information (continued)

Installation Instructions

Apply RAVATHERM XPS X 700 SL insulation boards parallel to roof perimeter long edges. Stagger end joints. Lay RAVATHERM XPS X 700 SL insulation boards with edges in moderate contact without forcing.

Cut RAVATHERM XPS X 700 SL insulation to fit neatly to perimeter blocking and around penetrations through roof, when using a 2nd layer stagger joints of insulation from first layer.

Apply no more RAVATHERM XPS X 700 SL insulation than can be covered with aggregate ballast/concrete roof pavers/green roofing in the same day.

Keep RAVATHERM XPS X 700 SL insulation minimum 75mm from heat emitting devices, and minimum 50mm from sidewalls of chimneys and vents.

Delivery conditions

Delivery form

Shrunk wrapped on a pallet, quantity depending on board thickness.

Storage and transport

During shipment, storage, installation and use, this material should not be exposed to flame or other ignition sources. This material contains a halogenated flame retardant additive system to inhibit accidental ignition from small fire sources.

Product identification

Information on the pack; Product name. Dimensions. Approvals. Production date.Hexabromocyclododecane (HBCD) was phased out prior to the 21st August 2015.
